

We would like to inform you that we have received a question from the prospective Bidder, see below the question and answer:

LOT # 1 - Physics Laboratory Equipment

Q1.

The specifications for Lot 1 Item 66 (Heat receivers) are very few. In order to avoid quoting wrong equipment we request more details on the same.

A1.

A Heat receiver is used to demonstrate the radiation as the type of heat transfer. It is an empty box having a cylindrical form. One side of the heat receiver is black colored and the other one is covered by silver colored and polished. During the experiment each side of the heat receiver is heated in turn. To show the difference of radiation for each side the heat receiver connects to a liquid manometer via the tube.
